

Co-operation with scientists – road to RDM services in the University of Tartu Library

Liisi Lembinen

University of Tartu Library

COAR/SPARC, Porto, 14-16 March, 2015

What am I going to talk about?

- Why?
- When?
- What?
- What is the value?
- What else?

Why we are doing this?

- We did not invent a wheel
- Keeping up with the trends
- OA pioneer in Estonia since 2009
- Open Data only logical step
- Already DSpace + OJS
- Support university goals – full cycle of research

What we did in one year

- Scientists + library = governmental funding
- DataCite → DOI → Estonian DataCite Consortium
- Data repository <http://datadoi.ut.ee>
- Data Librarians + services
- Information literacy includes data <https://sisu.ut.ee/teadusandmed>

Welcome to
DataCite Eesti web page!

What is the value?

- Scientists needed and found us not vice versa
- Relatively short time
- Data is already in curriculum
- Motivation and competence of librarians

What else need to be solved?

- 1 academic library (4 universities) cooperation with funders + scientists
- Data policy
- Funding for data
- Evaluation
- We opened a door

<http://www.ut.ee/ams/living-in-estonia/>

Thank you!
