The Complex CRIS/IR Landscape in the UK

RepNet map for CRIS/IR implementation at UK HEIs
This is a map of the available Research Information Management (RIM) infrastructure across UK HEIs. Five use cases for CRIS/IR implementation are featured on the map as identified by RepNet in collaboration with external stakeholders including IR managers and Research Office managers. Colour codes are as follows:
- IR-only: green
- IR+CRIS: blue
- CRIS-only: yellow
- IR+Symplectic: red
- IR+RMS: violet
- No data: white

If your institution is white-marked, please drop us a line with your specific RIM system configuration to support@repositorynet.ac.uk or fill in the RepNet survey at http://ukcorr.org/events/future-events/teesside-university-friday-9th-november-2012/repnet_survey. Thanks!

**UKRepNet Stakeholder Engagement: the STARS Joint Venture**

- **STARS:** [U of] **ST Andrews – RepNet – SDLC**

- An initiative for enhancing the U of St Andrews CRIS/IR Research Information Mgt System (i.e. PURE + DSpace-based IR) according to the RepNet worklines:

  - Enabling SWORD and testing SWORD-mediated content transfer (into Research @ St Andrews IR & into PURE?)
  - IRUS-UK implementation on Research @ St Andrews (PURE?)
  - OpenAIRE compliance for the IR and/or the CRIS
  - Preliminary RIOXX implementation on Research @ StAndrews
  - Testing a 2-way CERIF/MODS-DC gateway
  - ORCID implementation on PURE and Research @ StAndrews
  - LOCKSS Service extension to OJS-based journals and IR content
  - Proof of Concept for the RepNet Dashboard for monitoring OA mandate compliance
UKRepNet Stakeholder Engagement: the STARS Joint Venture

• RepNet to deliver a guest presentation on the joint venture at the UK PURE User Group meeting later this month in Dundee
