Maintaining information, in a correct and independently understandable form, over the long term

The Phaidra Experience

An international network of academic institutions

To ensure digital objects can be located, rendered, accessed and interpreted in the future

Phaidra stands for reliable long-term archiving and gives educational, research- and management staff, the possibility to publish, to store digital data and resources and to archive them indefinitely. Phaidra enables users to
- archive objects at the university and to permanently secure them, to create them systematically and to supplement them with metadata
- archive objects for an unlimited period of time - and to have world-wide access to them
- Phaidra provides a good frame in order to implement an open-access policy, e-learning strategies, self-archiving strategies and build a better record of the University’s achievements

Content providers
Researchers, lecturers, University management

Users
Professionals, national institutions (cultural heritage), cooperating researchers from outside the University

Applications
Specialized tools for accessing, viewing, editing and eventually storing digital assets

Projects
Europeana • Europeana Libraries • Tempus Project in Western Balkan Countries • OpenAIRE • OpenAIREplus • Linked Heritage • E-Book-Library • Dariah • Clarin
